Re: Termination of the Administrative Settlement Agreement and Order on Consent,
Hayford Bridge Road Groundwater Superfund Site, EPA Docket No. CERCLA-07-2012-0026

Dear Ms. Miller:

In the above-referenced Administrative Settlement Agreement and Order on Consent, or ASAOC, Ameren agreed to implement a Groundwater Containment System, or GCS, that included the operation of containment wells to prevent groundwater contamination and Integrated Site evaluation, or ISE, that included the collection of soil and groundwater samples on and near the property to determine the presence of volatile organic compounds. The ASAOC also required Ameren to reimburse the U.S. Environmental Protection Agency and the Missouri Department of Natural Resources, or MDNR, the Interim Response Costs and Future Response Costs incurred by the EPA and the MDNR under the ASAOC. The EPA has determined that it is appropriate to terminate the ASAOC as Ameren has completed the GCS and ISE, and met its financial obligations under the ASAOC.

The EPA appreciates the efforts undertaken by the Respondents under this ASAOC. We are hopeful that the efforts taken now and in the future will bring this site to a successful conclusion. If you have any questions regarding this matter, please contact me at (913) 551-7157 or at sperry.clint@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Clint Sperry", is positioned above the printed name.
